ARGIS to join the Callibrate platform

The New Year sees Calliden Groups Regional & Rural business – ARGIS, launching its home and contents insurance product range on Callibrate – the Calliden Sunrise Exchange platform.

This joins Calliden's suite of home, contents, domestic landlords and most recently, Calliden First Option Business insurance, which have been available on Sunrise for some time.

General Manager of ARGIS, Christine Neame, said "The introduction of ARGIS insurance products on the Callibrate platform will add to the options that our regional & rural based intermediaries have in dealing with us."

"Our network of intermediaries asked us to provide them with an online facility. We responded and have made available to them a simple, intuitive and streamlined platform", Ms Neame said.

With full life cycle capability and the option to suspend transactions in all products, Callibrate enables Calliden's network of intermediaries to easily and quickly quote, place and manage their domestic and business insurance portfolios.

Mike Hooton added "We can now offer our regional and rural based intermediaries the opportunity to transact domestic business easily and efficiently via Callibrate".
